

Lawsuit Against Academy Dismissed

ON FEB. 24, 2015, Judge Peter Flynn of the Circuit Court of Cook County, Illinois, dismissed without prejudice all claims against the Academy, including any claims for injunctive or declaratory relief, that were filed in December by former Society of Actuaries (SOA) President Mark Freedman.

Freedman, as reported in the December [Actuarial Update](#), had filed suit seeking to block the Actuarial Board for Counseling and Discipline (ABCD) from considering two disciplinary complaints filed against him. The complaints concerned an email solicitation from the SOA, which advised thousands of actuaries that “society membership provides—ease of movement from one area of practice to another without replacing credentials.”

Academy leadership released a statement to advise its members that the court strongly affirmed that the U.S. actuarial profession may require members to have disciplinary complaints heard by the ABCD and not by the courts. The Academy leadership views this ruling as a vindication of the profession’s self-discipline process.

When the transcript of the hearing is available, the Academy will post it on our [Litigation Update](#) page on the website. The transcript will be interesting reading to Academy members. The judge made clear that the court had been presented with no reason to intervene in the ABCD matter, and Illinois case law would not support any intervention.

The court did not rule on the motions to dismiss the remaining claims in the case, instead determining that it lacked jurisdiction to address them. The claims against the Casualty Actuarial Society were also dismissed. The remaining claims

against individuals were transferred to a different division of the Cook County Circuit Court, where the pending motions to dismiss those counts will be handled. No hearing on those has yet been set. ▲

DEADLINE: JULY 8

Academy Calls on HHS to Allow Changes to Premium Rate Filings if ACA Subsidies Are Eliminated

WITH THE U.S. SUPREME COURT set to issue a major ruling regarding the Affordable Care Act later this year, the Academy this month called on the Department of Health and Human Services to consider the potential implications for premium rate filings if premium subsidies are eliminated in the affected states.

In a [letter](#) to HHS Secretary Sylvia Burwell, the Academy’s Health Practice Council explained that, should the court decide in favor of the petitioners, a significant drop

in health plan enrollment and an increase in the risk profile of remaining enrollees would drive up average health costs for health plans in certain states if no action is taken to allow enrollees access to premium subsidies in states participating in the federally facilitated marketplace (FFM).

The letter notes that while elimination of premium tax credits in FFM states may result in higher average health care costs in those states, issuers may have lim-

Academy NEWS Briefs

Remembering Michael Stephen Abroe and Daphne Bartlett

THE ACTUARIAL PROFESSION lost two valued members of its community recently, with the passing of Michael Stephen Abroe and Daphne Bartlett.

An Academy volunteer for more than 20 years, Abroe was the recipient of the Jarvis Farley Service Award in 2011. He served as Academy vice president for health, was instrumental in the Academy's efforts to work with regulators implementing the Affordable Care Act, and served on the Actuarial Standards Board at the time of his death. Abroe doubtless touched the lives of many reading this.

The recipient of the Farley Award in 2000, Bartlett was a founding member of the Actuarial

Board for Counseling and Discipline, was a member of the Academy Board of Directors, and was instrumental in the creation of *Contingencies* magazine. As chairperson of the Joint Committee on Public Relations, she helped to develop the actuarial profession's first communications plan. They will be dearly missed. ▲

PROFESSIONALISM BRIEFS

➔ **Jeanette Manning**, senior associate actuary at OneAmerica Financial Partners in Lebanon, Indiana, has joined the Life and Health Qualifications Seminar Committee.

Volunteer Attestation Due Now

DO YOU SERVE ON AN ACADEMY COUNCIL, committee, task force, or work group? If so, thank you for your dedicated service to fulfilling the mission of the Academy.

Above and beyond your technical expertise, the effectiveness of your Academy work on behalf of the public and the U.S. actuarial profession hinges on providing unbiased, reliable information for policymakers and others who need actuarial insight to inform their decisions regarding U.S. fiscal and societal challenges.

One of the Academy's essential measures to cultivate the highest level of professional objectivity and independence when performing Academy work is the annual conflict of interest (COI) acknowledgement and continuing education (CE) attestation that every volunteer must sign.

Please take a moment now to review and sign your COI acknowledgement and CE attestation.

Action Steps Required Now

1. [Log in](#) to the Academy membership page.
2. Once logged in, click on the **COI and CE Acknowledgment** link in the right column to access the acknowledgment page.
3. Read and sign the document by clicking on the check boxes for each question.
4. Click just once on **Submit acknowledgement for both** to submit your response.

For more information about the Academy's commitment to professional objectivity, please visit the [Professional Objectivity at the Academy](#) page. If you have questions, you may contact the Academy's professionalism department at objectivity@actuary.org. If you experience any technical difficulties, please contact the Academy's membership department at membership@actuary.org or by calling (202) 223-8196. ▲

Academy Seeks Senior Fellows

THE ACADEMY is seeking two senior fellows to help communicate the Academy's message on property/casualty and pension actuarial issues to the public and to policymakers. Our fellows work with practice councils, interact directly with federal and state regulatory

and legislative officials, and communicate with the media about new developments in their fields. For more information and details on how to apply, see the job listings for [Senior Pension Fellow](#) and [Senior Property and Casualty Fellow](#) on the Academy website. ▲

To continue receiving the *Update* and other Academy publications on time, remember to make sure the Academy has your correct contact information. Academy members can update their member profile at the member login page on the Academy [website](#).

Dues Reminder

MEMBERSHIP DUES are due Jan. 1 every year. Members can [log in](#) to the Academy website to pay dues or print an invoice. ▲

IN THE NEWS

The Health Practice Council's letter to HHS commenting on the premium rate filing implications of *King v. Burwell* received widespread media coverage, including mentions in the [Chicago Tribune](#), the [Miami Herald](#), [Inside Health Policy](#), [Law360](#), and [PoliticoPro](#) (subscriber only). In an interview with McClatchy Newspapers, Senior Health Fellow Cori Uccello talked about some of the challenges that need to be addressed if premium subsidies are struck in states participating in the federally facilitated marketplace and action isn't taken to allow enrollees access to premium subsidies: "Insurers can't just flick a switch to increase premiums to take into account lower enrollment and higher costs."

Senior Pension Fellow Don Fuerst was [interviewed](#) by *iHeartRadio* about the

financial impact of the aging of our population on major public programs and different generations. "The top concerns are aging programs like Social Security and Medicare. Both of those programs are in desperate need of reform and change so that they will be viable on a long-term basis," said Fuerst. The interview aired on several Philadelphia-area stations. Visit the Academy [Newsroom](#) to stream or download the interview podcast.

Fuerst also provided comments to the [Military Times](#) for a story examining recommendations made in the Military Compensation and Retirement Modernization Commission's new report on military retirement systems. Fuerst expressed surprise at the 12.7 percent discount rate the report used, saying, "Twelve percent! My gosh, that is an outrageous rate to use for something like that."

Bloomberg quoted Public Plans Subcommittee Chairperson Bill Hallmark in an [article](#) examining the impact of the updated SOA mortality scale on New York's public pension plan. Projections of the state's pension fund liability have increased \$355 million under the updated scale. "Mortality rates have been improving faster than the last study predicted," said Hallmark. The story also ran in [Buffalo News](#) and [TheDay.com](#).

An [AdviserQ](#) column on why retirement planning is particularly important for women cites former Academy Social Security Committee Chairperson Janet Barr's Dec. 9 testimony before the U.S. Senate Committee on Finance hearing, "Social Security: Is a Key Foundation of Economic Security Working for Women?" The column notes that longer life spans and lower lifetime incomes put women at greater risk of financial insecurity in retirement. The column also ran in [Insurance News Net](#), the (Minnesota) [Sun Post](#), and [Working Woman Report](#).

An *Alexandria* (Virginia) [News story](#) reports on a statement issued by Rep. Don Beyer (D-Va.) following the release of the Academy's latest *Essential Elements* paper on the property/casualty costs of [climate change](#). "This sobering report is just the latest barometer of the long-term effects of global climate change in North America," said Beyer, who serves on the U.S. House Committee on Natural Resources and Science, Space, and Technology. The paper was also mentioned in a *Minnesota Public Radio* [Climate News](#) report. Visit the *Essential Elements* [homepage](#) to read this and other papers in the series.

The Academy's [assessment](#) of the New Brunswick Shared Risk Model was cited by [Yahoo Finance](#) and outlets in Canada reporting on a new retirement security report from Canada's Public Policy Forum. The story noted the assessment under the *Retirement for the AGES* principles as an achievement in ongoing work toward ensuring retirement security in Canada. ▲

Reserve Ranges and the Statement of Actuarial Opinion

THE ACADEMY and the Casualty Actuarial Society co-sponsored a webinar on Feb. 19 discussing [Reserve Ranges and the Statement of Actuarial Opinion](#) (SAO). Academy volunteer Janet Duncan led the session, using material developed by the Opinion Seminar Subcommittee of the Committee on Property and Liability Financial Reporting.

Duncan discussed considerations in preparing a reserve range in support of a U.S. statutory opinion, noting that the intended user and the measurement objective should inform the actuarial methods and sets of assumptions used.

"The two most commonly used types are a range of possible outcomes, meaning a full set of potential results, or a range of reasonable estimates, expressing the degree of uncertainty in producing an estimate," she explained. "The type will vary based on the intended purpose—reasonable estimates may fit in reports supporting the SAO, while possible outcomes may make more sense for risk-management scenario testing."

She gave the results of a survey of commonly used approaches. These included:

- A flat percentage adjustment, "often based on an actuary's experience with a certain line of business and the perceived variability in the estimation of loss and loss adjustment expense liabilities for the given line. But there is an increase in scrutiny from regulators and auditors as to how these end points are selected."
- A function of results from different methods: "For instance, an actuary may use the results of various methods to get a sense of how wide the range could be. In that case," she said, concerns include whether the answers are logical and consistent by accident year.
- Low and high alternate, but reasonable, sets of assumptions.

Duncan also noted issues to consider in communicating about reserve ranges. Intended users, she said, may have varying degrees of experience so "it's important that the disclosures in a report provide clear information for the specific target audience." ▲

▲ PROFESSIONALISM COUNTS

Retired but Providing the Occasional SAO? You Still Need to Be Fully Qualified

Some retired actuaries still provide part-time or consulting services, and some even do it out of the goodness of their heart (like reviewing the pension plan for your local church). The actuarial profession appreciates the wealth of knowledge and contribution of its retired members, and no doubt the public appreciates the charitable work of actuaries, but actuarial services must be performed in all situations by a qualified actuary, as required under Precept 2 of the [Code of Professional Conduct](#) (Code).

Imagine that a retired physician who has not kept up with his or her continuing education for years volunteered to give you a cancer treatment assessment, and you accepted the offer because it's free. Any profession would want the professional to decline services when not qualified, as this is not good for the client or the profession.

As a member of the Academy, you are bound to the Code, which is a badge of honor setting you apart from the average person, when you provide actuarial services, even if you are retired. Precept 2 of the Code clearly and unequivocally states that an actuary providing actuarial services must be qualified in every aspect, including basic and continuing education and experience. There is no word like "except" in Precept 2. The [U.S. Qualification Standards](#) (USQS), issued by the Academy, further detail what it means to be qualified.

So, if you provide even one statement of actuarial opinion (SAO), you must be qualified in terms of basic education, continuing education, and experience. Under the USQS there are no grace periods, no prorations, no exemptions if you are retired, or unemployed, or even a student. The principal for whom you provide actuarial services is still relying on your SAO.

Section 2 of the USQS requires any actuary issuing an SAO to meet the requirements for basic education, experience, and continuing education (CE) to be qualified to issue SAOs. Most retirees likely meet the basic education component, and even the

experience component depending on the area of practice they are asked to opine on, but many retired actuaries are relieved to no longer have to meet and track annual CE requirements. In failing to keep up with CE, you may miss an elemental change in actuarial practice, such as revised or new actuarial standards of practice, or new qualification requirements, which could result in your "occasional" SAO lagging substantially behind the work of your peers.

In a recent [Contingencies](#) article, past chair of the Actuarial Board for Counseling and Discipline (ABCD) Robert Rietz noted that the ABCD has seen a number of actuaries who have failed to fulfill their continuing education requirements. "[T]here are two main categories," he wrote, "those actuaries who are unaware of their continuing education requirements and those actuaries who are retired."

Over the years the profession has benchmarked the CE requirements in other professions, and actuaries in other countries, and the Committee on Qualifications concluded that 30 CE hours are not burdensome to obtain. Actuaries rendering actuarial services in Canada, for instance, need 100 CE hours in a rolling two-year period, and actuaries doing the same in Mexico generally require 40 CE hours annually.

One mutually beneficial way for retired actuaries to earn their annual CE is to participate as a member of an actuarial committee. The Academy welcomes and greatly utilizes the volunteer services of its retired members, who earn valuable CE serving on committees of interest to them while giving back to the profession and the public utilizing their years of wisdom and experience in contributing to today's actuarial issues. To assist qualified Academy volunteers who are retired or similarly situated in meeting the CE attestation requirement, the Academy is offering [free attendance](#) to Academy-sponsored (not jointly sponsored with other organizations) webinars, seminars, and other CE opportunities. Besides, what else are you going to do now that you have all that time in retirement? ▲

WE'D LIKE TO HEAR FROM YOU

Actuarial Update, like all Academy publications, is designed to serve you. With that in mind, we're gauging interest in making available printed copies of *Actuarial Update*. If you would find such an offering valuable, please email editor@actuary.org with your thoughts. And thank you for reading.

SAVE THE DATE

The Academy Capitol Forum: Meet the Experts webinar series returns March 25 with "How Did State & Local Pension Plans Become Underfunded?" Jean-Pierre Aubry, assistant director of state and local research at the Center for Retirement Research at Boston College, will speak. Academy Senior Pension Fellow Don Fuerst will moderate the session. Additional details on the webinar and registration will be available soon.

Call for Nominations for Academy Awards

AN ANNUAL EVENT most enjoyed by attendees at the Academy's annual meetings has been honoring the service to the actuarial profession embodied by those who receive recognition from their peers in several kinds of Academy awards for our members. 2015, being the Academy's 50th anniversary, will be a particularly noteworthy opportunity to nominate and receive one of these awards. All of these awards are voted on by the Academy's Executive Committee during the summer.

All members are welcome to nominate their colleagues for the Academy's three major awards.

The Jarvis Farley Service Award honors actuaries whose volunteer efforts on behalf of the Academy have made significant contributions to the advancement of the profession. It is a lifetime achievement award.

The Academy established the award in 1991 to honor one of its most dedicated volunteers. Jarvis Farley was a charter member of the Academy and an invaluable resource for the profession. He served on Academy committees from 1972 until his death in 1991. His untiring volunteer work for the Academy epitomized the caliber of service honored by the award.

See eligibility requirements and submit your nominations for the Jarvis Farley Service Award [here](#).

The Robert J. Myers Public Service Award honors public service actuaries who have made an exceptional contribution to the common good. The Myers Award honors an actuary for a single noteworthy public service achievement or a career devoted to public service.

The nominee may be a current or former government employee, the employee of an organization whose primary focus is government work, or an unpaid volunteer working at a philanthropic organization. Work as a paid consultant, as a member of an actuarial committee, or as an officer of an actuarial organization is ineligible.

Robert J. Myers was the chief actuary for the Social Security Administration from 1947 to 1970. He was instrumental in the design and funding of the Social Security system and was described by

Sen. Daniel Patrick Moynihan as "a national treasure." In recognition of his many years of extraordinary public service, the Academy created the Robert J. Myers Public Service Award in 1994.

See eligibility requirements and submit your nominations for the Robert J. Myers Public Service Award [here](#).

In addition to the two singular awards above, for several years the Academy's Executive Committee has also made several Awards for Outstanding Volunteerism to honor Academy volunteers in various practice areas who have made a single, noteworthy volunteerism contribution that is above and beyond what is reasonably expected of an Academy volunteer in the previous year. Eligible candidates are Academy members who have performed in a way that is conspicuously above and beyond what is reasonably expected with respect to volunteer duties and responsibilities for the Academy during the 12 months preceding the nomination. In addition to Academy council or committee participation, service on behalf of the Academy may include participation on committees of other organizations, such as the NAIC, that reflects positively on the Academy and benefits Academy members.

See eligibility requirements and submit your nominations for the Award for Outstanding Volunteerism [here](#).

The Awards will be given at the Academy's Annual Meeting and Public Policy Forum, Nov. 12-13 in Washington. ▲▲

Academy Kicks Off New Webinar Series on Global Health Care Costs

ON FEB. 18, the Academy hosted [Exploring Global Health Care Cost Drivers: Israel and the Netherlands](#), the first in a new series of webinars exploring health care cost trends around the globe, co-developed with the International Actuarial Association Health Section.

Dr. Tuvia Horev, an associate professor in the Department of Health Systems Management at the Guilford Glazer Faculty of Business & Management, Ben-Gurion University of the Negev, and Rian De Jonge of the Academy's Health Practice International Task Force, briefed listeners on the successes and challenges that both Israel and the Netherlands have experienced as they've worked to identify and address particular cost drivers of health care.

A [recording](#) of the session is available on the Academy website, free of charge for Academy members. There is a fee for nonmembers wishing to listen.

The speakers explored how their respective countries finance health care, the cost drivers they are facing and the methods of coping with them, as well as insights into their successes and the hurdles they have faced.

Israel, Horev noted, "is a small country with a relatively young population," with only 10.6 percent of its citizens over 65 as of 2013. The country has a national health insurance program that covers "100 percent of residents, without exception" through four funds that offer "a basic package of health care services."

These four "sick funds" are financed through an income-related health tax, and co-pays collected from users. "The state is required by law to make up any shortage of funds that remains," he explained. Though this structure is designed to keep the tax level sufficient to cover the expense, the government covered 40.6 percent of the

Advising the IRS

THE PENSION COMMITTEE this month sent a [comment letter](#) to the IRS regarding the use of mortality tables to calculate pension funding requirements for the years after 2015.

“In light of the Society of Actuaries’ (SOA) publication of the RP-2014 mortality tables and the MP-2014 mortality improvement scale,” the committee wrote, “IRS and Treasury may consider whether to use these tables based on the full dataset (or with adjustments for collar, amount or headcount weighting variants) as published, or with modification, or use alternative tables that reflect other sources of data or underlying assumptions.”

The letter continued, “We believe that pension plans should be using up-to-date mortality assumptions and best practices where possible. However, we believe that any changes to required tables for pension funding requirements should include alternatives for smaller plans (such as static tables) in order to simplify administration and valuations where the cost of the application of more sophisticated methods may not be justified.”

Furthermore, the committee wrote, “Introducing generational mortality in the calculation of lump sum benefits may increase the administrative complexity and cost of the plan; IRS and Treasury will have to weigh the increased cost to plan sponsors with the value provided to plan participants. In general, we recommend adopting methods that favor simplicity where the value of additional refinements in the resulting liability or lump sum benefit is small.”

Acknowledging that “many of the questions the IRS and Treasury will consider do not have clear answers,” the committee expressed its desire to meet with IRS officials to discuss “our understanding of the arguments in favor of, and against, the variety of techniques, methodologies and specific assumptions that you may consider.”

The committee also submitted [comments](#) to the IRS and Treasury on potential improvements in the operation of Internal Revenue Code Section 436 while still protecting the funded status of pension plans. The recommendations address timing, application and avoidance rules of benefit restrictions, and conflicts with collective bargaining agreements. ▲

PENSION BRIEFS

- ➔ **Frank Todisco**, chief actuary at the U.S. Government Accountability Office in Washington, and **Alan Milligan**, chief actuary at the California Public Employees’ Retirement System in Sacramento have joined the Pension Practice Council.
- ➔ **Donald Morgan**, senior vice president and actuary at The Segal Co. in Boston, has joined the Pension Committee.
- ➔ **David Driscoll**, principal and consulting actuary at Buck Consultants in Boston, has joined the Public Plans Subcommittee.

Council Comments on Ratemaking Proposals

THE CASUALTY PRACTICE COUNCIL this month submitted [comments](#) to the Actuarial Standards Board (ASB) on an exposure draft of a proposed actuarial standard of practice (ASOP), *Property/Casualty Ratemaking*.

The comments “encourage the ASB to give serious consideration to limiting the scope of this ASOP to regulatory filings for property and casualty ratemaking,” noting that, without such a limitation, the ASOP “does not sufficiently address or give adequate guidance for the many other types of insurance and alternative risk transfer mechanisms to which it would apply.”

The council also recommended adding a section on the relationship between ASOPs and regulations, and noted that it has made largely similar recommendations in a [letter](#) to the Casualty Actuarial Society regarding its *Discussion Draft: CAS Statement of Principles Regarding Property and Casualty Insurance Ratemaking*. ▲

CASUALTY BRIEFS

- ➔ **Mary Ann McMahon**, consulting actuary at Milliman Inc. in Wakefield, Massachusetts, **Raji Bhagavatula**, principal at Milliman Inc. in New York, Martin Simons, public actuarial consultant at Martin M. Simons Public Actuarial Consultant in Columbia, S.C., and **Chester Szczepanski**, senior vice president and chief actuary at Donegal Insurance Group in Marietta, Pa., have joined the Workers’ Compensation Committee.
- ➔ **David Traugott**, enterprise risk analyst at State Farm Life Insurance Co. in Bloomington, Ill., has joined the Property and Casualty Risk-Based Capital Committee.

Life Groups Submit Letter to NAIC on XXX/AXXX Reinsurance Proposal

THE PBR STRATEGY SUBGROUP and Life Reinsurance Work Group sent a [comment letter](#) to the NAIC's PBR Implementation (EX) Task Force regarding its recent XXX/AXXX reinsurance supplemental proposal.

The letter expressed the groups' "appreciation for the Task

Force's effort to differentiate reporting requirements in the Exhibit for 'grandfathered' XXX/AXXX policies not subject to the new framework requirements of AG48 from reporting for policies that are subject to the framework," and offered suggestions for several changes to the proposal. ▲

LIFE BRIEFS

- ➔ **Robert Mitchell**, vice president and actuary at Unum in Portland, Maine, **Kristin Norberg**, manager at Ernst & Young LLP in Chicago, **Allen Livingood**, vice president at Unum in Portland, Ore., **Patrick Wallner**, assistant vice president at Unum in Portland, Ore., **William Obert**, vice president, individual valuation at Unum in Chattanooga, Tenn., and **Thomas Lonergan**, actuary in Hartford, Conn., have joined the Tax Work Group.
- ➔ **Eric Janecek**, assistant vice president and associate actuary at Lincoln Financial Group in Greensboro, N.C., **Nicholas Pucci**, actuarial consultant at Mass Mutual Financial Group in Springfield, Mass., and **William Allen**, actuary at Transamerica in Baltimore, have joined the Stress Testing Work Group.
- ➔ **Novian Junus**, principal consulting actuary at Milliman Inc. in Seattle, **Cynthia Levering**, actuary in Baltimore, **Andrew Forgrave**, actuary at Jacob Haxton & Boord LLC in Worthington, Ohio, and **Benjamin Yahr**, actuary at Ernst & Young LLP in Philadelphia, have joined the Lifetime Income Risk Joint Task Force.
- ➔ **Larry Bruning**, life actuary at National Association of Insurance Commissioners in Kansas City, Mo., and **Kui Chen**, actuary at Genworth Financial in Richmond, Va., have joined the Life Reserves Work Group.
- ➔ **Marianne Purushotham**, corporate vice president at LIMRA in Windsor, Conn., has joined the Life Experience Committee and Annuity Reserves Work Group.
- ➔ **Steve Verhagen**, vice president, corporate actuary at CUNA Mutual Group in Madison, Wis., has joined the Life Financial Reporting Committee.
- ➔ **James Thompson**, actuary and consultant at Central Actuarial Associates in Crystal Lake, Ill., has joined the Life Valuation Committee.
- ➔ **Michael Yanacheak**, actuarial administrator at Iowa Insurance Division in Des Moines, Iowa, has joined the Nonforfeiture Modernization Work Group and ARWG VM-22 Subgroup.
- ➔ **Charles Souza**, vice president, structured finance at RGA in Chesterfield, Mo., has joined the Life Reinsurance Work Group.
- ➔ **Dean Slyter**, actuary at Accenture in Cedar Rapids, Iowa, has joined the Contingent Annuity Work Group.
- ➔ **Bo Ouyang**, actuary at New York Life Insurance Co. in New York, has joined the Deposit Fund Subgroup.
- ➔ **J. Timothy Gaule**, director, corporate actuary at CUNA Mutual Group in Madison, Wis., has joined the Annuity Reserves Work Group.
- ➔ **Trevor Huseman**, managing director at Miller & Newberg, Inc. in Overland Park, Kan., has joined the Annuity Illustrations Work Group.
- ➔ **Mark Evans**, president at Applied Stochastic LLC in Louisville, Ky., has joined the AG43/C3 Phase II Work Group.

HEALTH BRIEFS

- ➔ **Annette James**, lead actuary for the State of Nevada Division of Insurance in Carson City, Nev., has joined the Health Practice Financial Reporting Committee, Health Care Receivables Factors Work Group, Health Solvency Work Group, Health Practice International Task Force, Stop-Loss Work Group, Risk Sharing Work Group, and Actuarial Value Subgroup.
- ➔ **John Price**, actuary at Axene Health Partners LLC in Danville, Calif., has joined the Stop-Loss Work Group, Medicaid Work Group, and State Long-Term Care Task Force.
- ➔ **Philip Bieluch**, managing member at Insurance Signals LLC in Avon, Conn., **Rachel Killian**, actuary at Milliman Inc. in Atlanta, and **Kuanhui Lee**, actuarial services manager, commercial markets at Medica in Minnetonka, Minn., have joined the Small Group Market Task Force.
- ➔ **Richard Tash**, senior consultant at OptumInsight Consulting in San Francisco, and **Matthew Kramer**, actuary at Milliman Inc. in Chicago, have joined the Health Solvency Work Group.
- ➔ **Li Wang**, senior actuarial consultant and associate actuary at United Healthcare in Cypress, Calif., has joined the Actuarial Value Subgroup.
- ➔ **Peter Davidson**, director at PricewaterhouseCoopers LLP in San Francisco, has joined the Medicaid Work Group.
- ➔ **Tom Messer**, consulting actuary at Fidelis Care New York in Queens, N.Y., has joined the Risk Sharing Work Group.
- ➔ **Bernard Rabinowitz**, senior vice president and chief actuary at USHealth Group in Fort Worth, Texas, has joined the Stop-Loss Work Group.

Answering IAIS Questions on Global Capital Standards

THE SOLVENCY COMMITTEE of the Risk Management and Financial Reporting Council this month submitted [comments](#) to the International Association of Insurance Supervisors on its *Risk-based Global Insurance Capital Standard* public consultation document.

The committee provided responses to a number of more than 150 specific questions asked in the consultation paper, addressing issues such as what principles would be appropriate as the foundation for a global consolidated insurance capital

standard, whether the IAIS should develop a consistent and comparable margin over current estimate, and whether the use of external models should be allowed. ▲

RISK MANAGEMENT AND FINANCIAL REPORTING BRIEFS

➔ **Emily Gilde**, vice president at AIG Property & Casualty in New York has joined the Reinsurance Committee.

Health Care Costs, continued from Page 5

cost in 2013—the most recent year for which data are available.

That basic package, however, does not cover all of the health care Israeli citizens consume. So, Horev said, “a growing private sector” offers additional plans that provide care beyond the basic package.

Israel’s main cost drivers, Horev explained, include the aging of the population, chronic morbidity related to an increase in life expectancy and life span, expensive medical technology, and a system of incentives that could be more efficient.

The Netherlands faces an older average population than Israel, according to De Jonge, with 15 percent of its current citizens over age 65. Approximately 13 percent of Americans have reached that age, De Jonge said. The Netherlands has a two-layer system for health care. Long-term treatments are the responsibility of a state-controlled insurance system, while regular medical treatment is cov-

ered by private insurers, but insurance is mandatory, with plans offering a required set of coverages.

The country faces unusually high expenditures for inpatient care, De Jonge said. “Inpatient care as a percentage of total spending is high. Not the highest in Europe, but high.” He also cited “the Western lifestyle and demanding patients,” aging, and upcoding as significant cost drivers.

The Netherlands, De Jonge said, is exploring options to increase the percentage of health care that can be done on an outpatient basis, and looking for ways to utilize general practitioners to provide more care. “We want to shift from volume-based to quality-based incentives,” he said, “and to decrease improper use of the system, such as upcoding.”

The Academy and the IAA plan three more webinars in the series. The next webinar will be held in May, and will focus on the United States and South Africa. ▲

Supreme Court, continued from Page 1

ited ability to meet those higher costs for 2015 and 2016 plan years.

The council explained, “Premiums for 2015, which are already in place, and premiums for 2016, which need to be submitted prior to the court’s ruling, would likely be inadequate to cover claims.”

To help mitigate the potential for inadequate premiums for 2016, the letter outlines a couple of possible options:

➔ Allowing insurers to submit two sets of continuing premium rates—one set reflecting pricing

assumptions that would be appropriate if premium tax credits continue to be available and the other reflecting pricing assumptions that would be appropriate if premium tax credits are no longer allowed.

➔ Allowing premium rate revisions after the May 15 submission deadline.

The letter was publicized in a [news release](#) Feb. 24. The court will hear oral arguments in the case, *King v. Burwell*, March 4. A ruling is expected after the court’s current term ends in late June. ▲
