

Academy Structure and Governance

THE AMERICAN ACADEMY OF ACTUARIES is a national organization formed in 1965 to bring together, in a single entity, actuaries of all specializations within the United States. A major purpose of the Academy is to act as a public information organization for the profession. Academy committees regularly prepare testimony for Congress, provide information to congressional staff and senior federal policymakers, comment on proposed federal and state regulations, and work closely with the National Association of Insurance Commissioners and state officials on issues related to insurance and other forms of risk financing. The Academy establishes qualification standards for the actuarial profession in the United States and houses two operationally independent boards: The Actuarial Standards Board promulgates standards of practice for the profession, and the Actuarial Board for Counseling and Discipline helps to ensure that high standards of professional conduct are met.

Board of Directors
