

Comment #20—9/25/2020—4:33 p.m.

Though I do not believe that DE&I should be required as a separate topic, I believe it should be included in professionalism education and every member should be encouraged (not forced) to have some education on this topic.

I believe including it as professionalism is reasonable knowledge of it helps us all act professionally and not embarrass ourselves or the actuarial profession.

Thanks for listening.
